

WAVE

3.6 - 4.0 - 4.4 - 4.8 - 5.2 - 5.6

Avanti is rising from the ashes with a next generation wave weapon. Semi-compact, with a high-cut foot roach, the **Fenix** has the juice to push a modern multifin-waveboard, without compromising stability over a huge wind range. The overall versatility is well-tested and proven, with excellent results in both messy onshore, and cross-on conditions.

*"For a long time, I've been obsessed with compact outlines and sail graphics based on real artwork. The Fenix has all the ingredients of my past work, plus a lot of modern tweaks. This sail is what it's all about."*

*--Dan Kaseler*
